

Oil or Paraffin Indirect Fired Heaters

Whether you work in construction or need to heat and dry any enclosed area, the Meteor is more than up to the job. The heat developed from the stainless steel combustion chamber is clean and fume free due to the heat exchanger. This keeps the exhaust gas and hot air separate, making the Meteor ideal when working in an enclosed area.

- + Ideal for drying in building sites and heating closed premises
 - + Compressor heater with stack
 - + Functions on oil or paraffin
 - + Stainless steel combustion chamber with automatic cooling
 - + Heat exchanger to keep exhaust gas and hot air separate
 - + Pneumatic atomising burner
 - + Photoelectric flame sensor
 - + Automatic electric safety and control device
 - + Set to be connected to a room thermostat
 - + Unleaded epoxydic powder paint
- + Ideal for drying in building sites and heating closed premises

SPECIFICATIONS

	Meteor	Meteor with Optional Stand
Heat output (kW)	14.5	26
Voltage (Volts)	230	230
Btu	50,000	89,400
Weight Kg	35	46
Dimensions W x L x H (mm)	485 x 860 x 570	560 x 930 x 625
Tank Capacity (Litres)	30	46
